

Project update

Elf Farm Supplies began upgrading its Mulgrave facility in late August 2016 to install the latest technology to manage odour generated at the site. The following is a summary of work that has occurred in the past three months:

Over the last three months, significant progress is continuing to be made on the upgrade of our facility.

- Work has continued on installing process air extraction ducts throughout the plant.
- We have begun installing electrical and cooling water services, including cooling towers and pumps.
- We have been completing the main building structure. The structure will be completed over the coming months.
- We have started installing machinery and conveyor systems. This work will also continue over the coming months.

Construction of the phase 2 and 3 tunnel building will commence shortly.

The structure of the main building is nearly complete

Panelling to enclose exhaust tunnels

Cooling towers being installed

An aluminium air extraction duct being installed on top of the main building

Information session

We are holding quarterly information sessions about our upgrade until it is complete. The information sessions give the community the opportunity to learn more about the project, by viewing project plans up close and talking to members of the project team.

The next information session will be held from **11.00am to 2.00pm on Saturday 17 February 2018**, in the Tebbutt Room at the Hawkesbury Central Library, 300 George Street, Windsor.

These are 'drop-in' sessions, so there is no need to RSVP to attend. Just come along at the time that suits you best.

If you would like to be kept informed about future sessions, please register for electronic updates via the Contact Us page of our website, see details below.

Further information

Call **1800 155 079** to register concerns or complaints.

The Complaints Line operates from 8.00am to 5.00pm, Monday to Friday, with the exception of public holidays. Voice messages can be left at any time.
